alishkaahmadov

## PROFESSIONAL SUMMARY

Full Stack Web Developer with extensive experience across a broad range of programming utilities and languages. Expert in both backend and frontend development, with a keen ability to adapt to new technologies swiftly. A dedicated and collaborative team player with over 5 years of professional experience, including freelance work building websites for international and local clients. Consistently delivering robust, scalable solutions tailored to diverse client needs.

## EXPERIENCE

### 2023 - PRESENT

Microtech LLC

#### Full Stack Web Developer

- Designed and developed the official website and admin panel for Azerbaijan Water Supply Company (Azersu OJSC) from scratch, ensuring functionality, usability, and a user-centered design.
- Refactored and upgraded frameworks, modules, and plugins to their latest versions and added new features to the Constitutional Court of the Republic of Azerbaijan's website.
- Enhanced the State Advertising Agency of Azerbaijan's website with new features such as an online admission system and made the content more dynamic and manageable from the admin panel.
- Note:** All of these websites are government projects that were rigorously reviewed and approved by state security agencies.

### 2021 - 2023

Mover LLC

#### Full Stack Web Developer

- Facilitated the delivery of various content types (notifications, banners, carousels, polls) to customers via Firebase Cloud Messaging (FCM) and MQTT.
- Developed an online centralized chat system between clients and employees using MQTT.
- Integrated real-time messaging across Telegram, Gmail, Facebook, and Instagram into the chat system, allowing unified communication from within the application.
- Implemented a chatbot system with automated flows based on user interactions and preferences.

### 2019 - 2021

Sumgait Technologies Data Center

#### Full Stack Web Developer

- Built a contactless restaurant ordering system and a QR-based interactive menu UI.
- Created responsive, map-based UIs for GPS monitoring systems to track real-time vehicle activity and control.
- Generated comprehensive reports for a GPS Monitoring System, including travel distances, speed limits, fuel consumption, and movement trajectories using stored procedures in MS SQL.
- Designed and maintained RESTful APIs to ensure efficient and seamless integration between frontend and backend systems.

## EDUCATION

2016 - 2020 | National Aviation Academy

### Process Automation Engineering

Graduated with Distinction (Red Diploma)
